

## BarberIn: Your Solution to a Perfect Haircut

**1. Cristian** Have you ever wanted to be sure that your haircut is going to turn out well? As a man, I've had many experiences like this. I always want to feel confident in my look, because first impressions are very important, and appearance always plays a big part.

**2. Yezid** Also, what about when you travel to a new place and need to find a good barber? You want to feel secure with your haircut, even in a new city. We know a solution is needed for all these reasons.

**3. Wilfren** That's why we created **BarberIn**. It's a new and innovative app to find the perfect barber for you. Our app will change the market because we are a specialized community for barbershops. We want to be the best platform for barbers and their clients, offering a complete solution from finding a barber to booking an appointment and seeing their work.

**4. Reynaldo** With our app, you can see what styles the barbers are good at and also see the rating of the barbershop, so you know if it's a good place. You can even see the prices for different haircuts.

**5. Sebastian** And you can find the barbershops that are closest to you, which is very helpful. We also offer other options like booking your appointment directly on the website and seeing the profiles for the barbers, where you can see their work.

### Monetization & Call to Action

**6. Wilfren** Our main source of monetization will be offering premium subscriptions for barbershops. These subscriptions provide significant benefits, such as increased visibility on our site, access to special tools to manage their appointments and clients, and the ability to showcase their work more prominently to potential clients.

**7. Sebastian** We are not just a list of places; we are a dedicated tool for the barber industry. We're confident that this app will change the market.

We are seeking **investment** to expand our platform and add new features. We want to hear from you to discuss how we can partner to make BarberIn the ultimate tool for the barber industry.

### Questions

1. Who are your main competitors? Our main competitors are general booking apps and social media platforms. But they are not only for barbershops. Our focus is specific to this market. We want to be the best platform for barbers and their clients, offering a

complete solution from finding a barber to booking an appointment and seeing their work.

2. What makes your website different from Google Maps and its reviews? Our platform is a specialized community for barbershops. Google Maps has general reviews, but our site offers very detailed information. For example, we show the barber's personal profile, the styles they specialize in, and you can book an appointment directly. This gives clients more security and a better experience. We are not just a list of places; we are a dedicated tool for the barber industry.
